

# Stripping Boots

## Reduce Slips & Falls

**Pro-Link's stripping boots** with slip resistant soles decrease the risk of slipping and help prevent accidents during the stripping or scrubbing process.

Stripping boots keep footwear clean, dry, and away from chemicals. The replacement soles are designed to act as a gripping agent on wet floors to prevent slippage, making everyday tasks safer for those cleaning floors. The unique material of the replacement soles can help remove skid marks from floors as well.

### Key Features

- Reduces risk of slipping and falling
- Protects footwear from harsh chemicals
- Ideal for keeping footwear clean and dry
- Aids in accessing hard to reach corners
- Helps remove stubborn black marks from floors

The boots fit over most standard shoes, and are sold in small, medium, large and extra-large sizes. The yellow boots are packaged with two sets of replacement soles. Additional replacement soles are available in packs of three pairs.

*Slip resistant soles are easily attached or replaced with secure velcro strips that are permanently attached to the bottom of the boots.*
